I. Problem

Six houses near the intersection of Hilltop Road and Hess Road were found exempt from our district area. This has created legal issues along with an ongoing legal case. The legal case is regarding six houses found to be exempt based on inclusion documents and the movement of Hilltop Road. Following the ongoing legal case came the need for a reassessment of the PWSD district area. Upon beginning the assessment, it was found that PWSD and Douglas County's district boundary area do not match, which can be seen in Map 1. If unresolved, further legal issues can and will occur. The reassessment of PWSD's district boundary will also aid in the aforementioned legal issue. To resolve potential inaccuracies in our data, reviewing our onsite legal inclusions will ensure a more accurate district boundary. Scanning and referring to the legal documents for each onsite inclusion will ensure a more easily accessible digital trail that can be referred to in the future.

II. Project Development Process

i. Planning

The objective and purpose of the project was described along with the problem it posed. The main objective was to create an accurate district boundary area based on PWSD's onsite inclusion agreements.

ii. Analysis and Design

A draft workflow was created, reviewed, and then finalized. Section III refers to the project workflow that was followed.

iii. Development

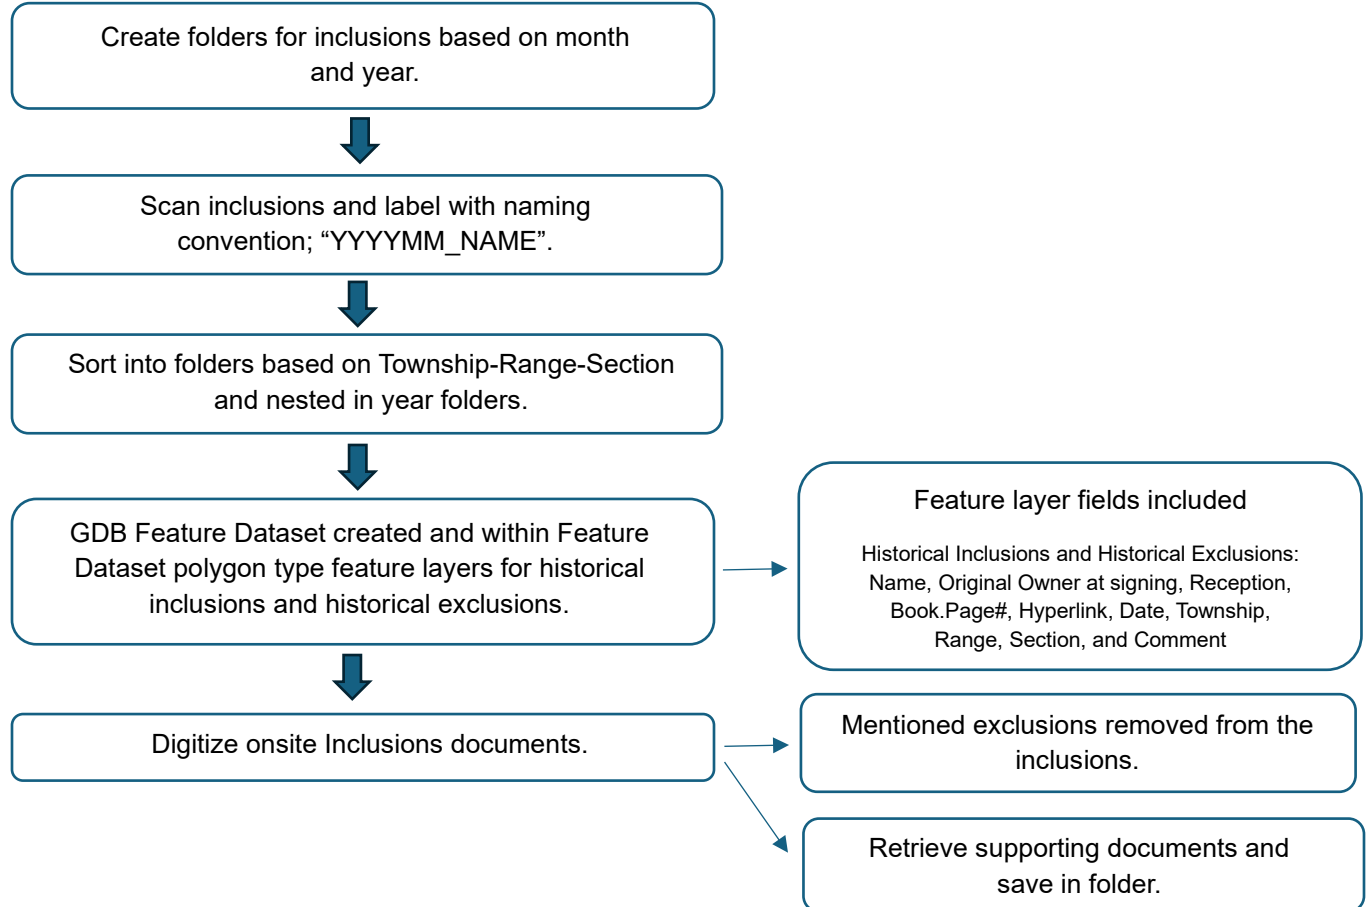

After the project workflow was developed, we saw a steady and accurate progression in digitization of PWSD's onsite inclusion documents. Through the digitization of these inclusions, the district boundary area based on PWSD's onsite inclusion documents was created. This revealed the lack of inclusion documents we have on hand. It also revealed the two inclusion documents, referred to as Onetia K. Williamson (1983) and Pine Ridge (2001) Inclusion, were accurate based on the land survey in the exemption of the six houses.

iv. Monitoring

Moving forward, Douglas County official records will have to be searched for the missing onsite inclusion documents and saved within our database. Once these are located, then digitization of these documents can begin under a separate layer to distinguish between the onsite and Douglas County records inclusion documents. Further validation of accurate entry of inclusions should be conducted after all known inclusion documents have been entered. A decision on inclusion of roads and ROWs that have moved will have to be evaluated and decided on.

IV. Issues and Concerns

While conducting this project discrepancies in descriptions of legal land descriptions and accurate land surveys appeared. A major concern is the large amount of missing onsite inclusion documents. A list of the PLSS areas that have missing inclusions which are either partial, or full areas have been compiled and are as follows:

Township 6S Range 65W

19(NW,SW)

&

Township 6S Range 66W

4(SE), 9(NE,SE,NW,SW), 10(SW), 15(NE,SE,NW,SW), 21(SE), 22(NE,SE,NW),
23(NE,SE,NW,SW), 24(NE,SE,NW,SW), 26(NE,SE,NW,SW),
27(NE,NW,SW),28(NE,SE), 30(SE,SW), 31(NE,SE,NW,SW), 34(NE) & 35(NW)

&

Township 6S Range 67W

25(SE,NW,SW) & 36(NE,SE,NW,SW)

&

Township 7S Range 66W

1(NE,NW) & 3(SE,NW,SW,).

Many PWSDs onsite inclusion documents are only agreements or petitions for inclusion and not orders of inclusion. Along with this, some documents are missing receptions numbers. This brings into question whether the inclusion document is legal and filed. Please see Table 1 for these mentioned inclusion documents.

V. Next Steps

Moving forward the first step is to refer to Douglas Counties official record [website](#) to seek out the missing inclusion documents, locating documents for inclusions listed in Table 1 and PLSS referenced in section IV., then saved to the G drive to digitize in PWSD's system. The process of locating the missing inclusion documents has begun, and the file location can be found here; "G:_Projects_GIS\PWSD_Inclusions_Project\Pending_Documents\Douglas County Inclusions". Please see Map 2 for the ongoing digitized Douglas County Inclusions included with PWSD's onsite inclusions. Once we have found all the inclusions that Douglas County has, we can then see the full picture of our district boundary based on all existing inclusion documents.

VI. *Future Considerations and Solution*

The largest issue that came about during this project was the lack of accurate record keeping on PWSD's part. Many inclusion documents appear to be missing and lack court orders for inclusions. More accurate information on inclusion documents should be filed and scanned periodically to make sure we continue to keep accurate records for PWSD and for any other future legal matters that may arise. This would require delegation of responsibilities to a single work unit or single person within a work unit to ensure that the task was properly recorded and periodically checked on. Decisions on how to handle ROWs and roads in the district will have to be discussed.

VII. *Summary*

A complete digital archive of all onsite PWSD inclusions was completed and digitized. Please refer to Map 3 for the visualization of onsite inclusions. When comparing the onsite inclusion documents to Douglas Counties district boundary a difference of 67 km² and compared to PWSD's district boundary a 13.09 km² was found. Please refer to Table 2 and 3 for all calculations. Regarding the six exempt houses due to road movement, all six houses have some percentage of inclusion based on our documents which can be seen in Image 1. When taking this into account we can get a percentage of the houses' exemption and inclusion based on the original inclusions, please refer to Table 4 for this summary. This information should be taken into consideration when deciding on the inclusion of the six currently exempt houses. While this project is not near fruition a solid base and framework has been started along with a workflow and direction towards next steps.

VIII. *Afterthoughts*

This project taught me a lot and has aided in my growth tremendously. I learned how to read legal documents carefully and research particular wordings within legal documents. The biggest take away from this project for me was honing my skills on file organization, documentation of workflow, and accuracy of digitization. I personally really enjoyed the simple analysis of the area calculations and believe it gives that quantitative data to aid in the visualization component that came with digitizing the inclusions.

Map 1 Current PWSD and Douglas County District Boundaries

The map displays the geographical area covered by the Parker Water & Sanitation District. The district's boundary is shown as a solid black line, while areas designated as 'Onsite Inclusions' are shaded in light blue. Numerous locations are labeled throughout the map, including Stonegate - Water Rights, Parker Pointe, Jordan 92, Woodman-Mahrt, Public Service Credit Union, Sierra Ridge, Weaver, Mountainview Development, Hell Cross Ranch, Wolf Willow, Stonegate, Lincoln Creek Village, Carousel Farms, Clarke, Howrey, Kime Ranch, Harvey Parcel, Colony Ridgegate, Colony Ridgegate, Newlin Crossing, Senderos Creek, Twenty Mile Town Cemetery Main West Gate, Pine Drive Property, Serling-Kime Snow, Harvey Open Space, Wintergreen Homes, Freshfields, Quorumtown, Newlin Aeres, Development Pathways, Salsbury Heights, Pope Property/Parker Pavilion, Reata North, Parker Mesa, Hilltop Development, Hess Road Property, Robinson Brick, Pine Ridge, Tallman Gulch, Waldens Hilltop, Veters Ranch, Village of the Green, Windy Creek, Canyon, Cielo & Arlington Heights, Ayala Bay, and Canyons. A scale bar at the bottom right indicates distances from 0 to 4 miles. The text 'Created By: Breanni Larson 08/12/2025' is located below the scale bar.

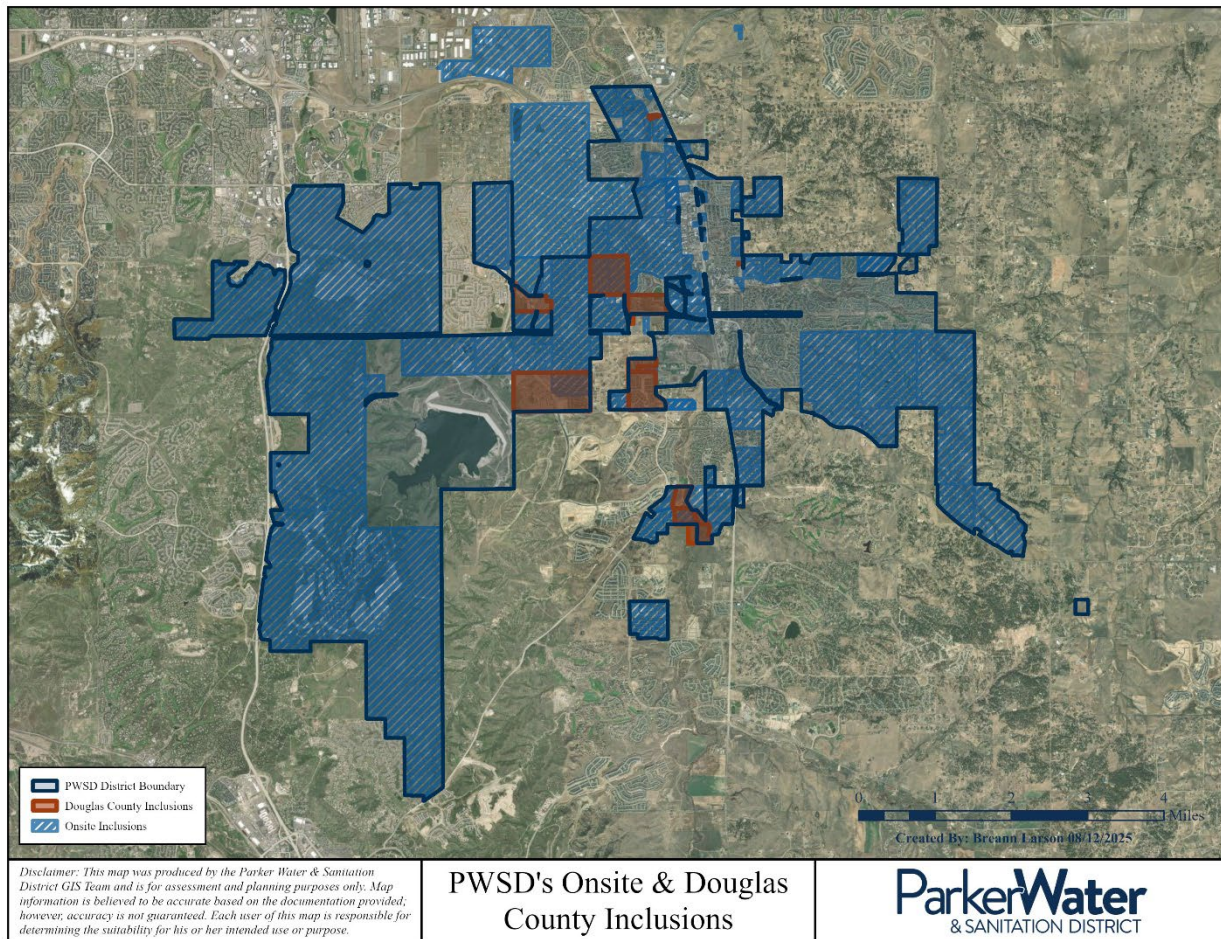

Disclaimer: This map was produced by the Parker Water & Sanitation District GIS Team and is for assessment and planning purposes only. Map information is believed to be accurate based on the documentation provided; however, accuracy is not guaranteed. Each user of this map is responsible for determining the suitability for his or her intended use or purpose.
